

SAVIEO SEBASTIAN

Support Engineer | Linux Systems & Production Operations

Edmonton, Alberta, Canada (MST) | savieoseb@gmail.com | linkedin.com/in/savieo-sebastian | github.com/savieo

SUMMARY

Production-focused Support Engineer with 6+ years of experience troubleshooting Linux-based systems across healthcare SaaS, e-commerce platforms, and distributed environments. Experienced in customer-facing technical ownership, log analysis, SQL diagnostics, Python/Bash automation, CI/CD support, monitoring, and incident response in high-availability environments.

CORE SKILLS

Linux / Systems	Ubuntu, CentOS, Windows Server, SSH, systemctl, journalctl, cron, production debugging
Automation	Python, Bash, shell pipelines, awk, sed, grep, operational tooling
Data / DB	PostgreSQL, MySQL, Sybase, SQL diagnostics, query troubleshooting
Monitoring / Incidents	Grafana, alert triage, RCA, on-call support, incident bridge coordination
Networking	TCP/IP, DNS, VPN, Zscaler, GlobalProtect, nmap, connectivity troubleshooting
Support Tools	Zendesk, Jira, ServiceNow, Confluence, Git, CI/CD fundamentals

EXPERIENCE

Technical Support Specialist | Tier 2 - Shopify (Sep 2025 - Present)

Provide Tier 2 technical support for SaaS integrations, authentication workflows, payment systems, and API-related issues. Manage high-volume distributed support cases in an SLA-driven environment using Zendesk. Reproduce defects, write structured engineering escalations, and contribute to internal documentation and knowledge base improvements.

Information Systems Specialist - Intelera Medical Systems (Sep 2021 - Jan 2025)

Delivered Tier 1/Tier 2 infrastructure and backend support for 20+ hospital environments across North America, Europe, Australia, and India. Managed approximately 250+ monitoring alerts per month and 15-20 active production client cases, resolving approximately 85% without escalation. Troubleshoot Linux services, PostgreSQL/Sybase issues, PACS/RIS workflows, DICOM/HL7 routing, storage pressure, backup/audit issues, VPN/network failures, and Code Blue incident bridges.

Embedded Systems Support Engineer - Calko Canada Inc. (Apr 2019 - Apr 2021)

Provided Tier 2/3 technical support for embedded manufacturing systems and cloud backup platforms. Configured IP and wireless networking components, supported system audits, and automated QA testing procedures to improve deployment consistency.

Software Developer / Python Engineer - Turbolab Technologies (Jan 2018 - Nov 2018)

Built 100+ reusable Python automation scripts for data extraction, API validation, workflow optimization, and web scraping using Scrapy, Selenium, Pandas, REST APIs, and Git-based workflows.

EDUCATION & WORK AUTHORIZATION

Attestation of College Studies - Programming & Internet Technologies, Institut Supérieur d'Informatique (ISI), Montreal. Bachelor of Technology - Computer Science & Engineering, Mahatma Gandhi University, India. Permanent Resident of Canada; open to remote roles across Canada.
